

Dřevěný portálový jeřáb

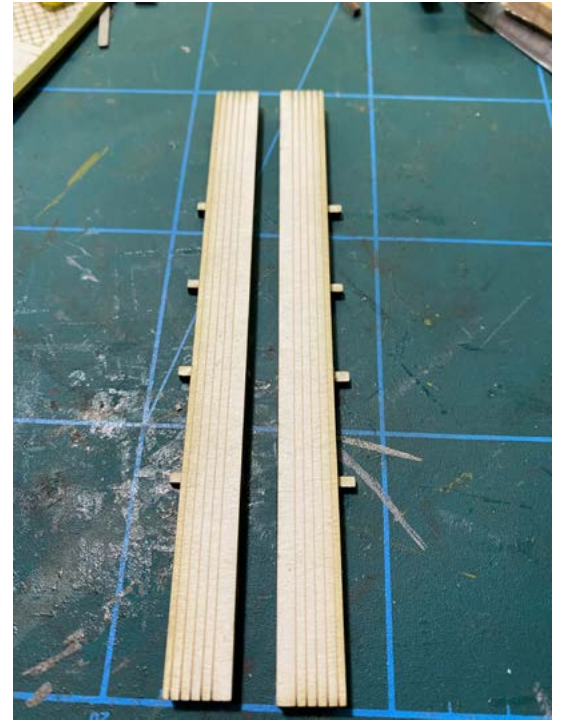

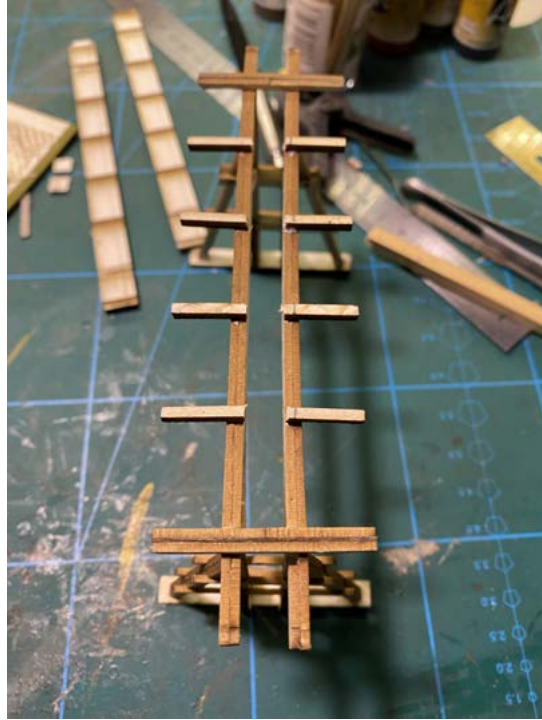

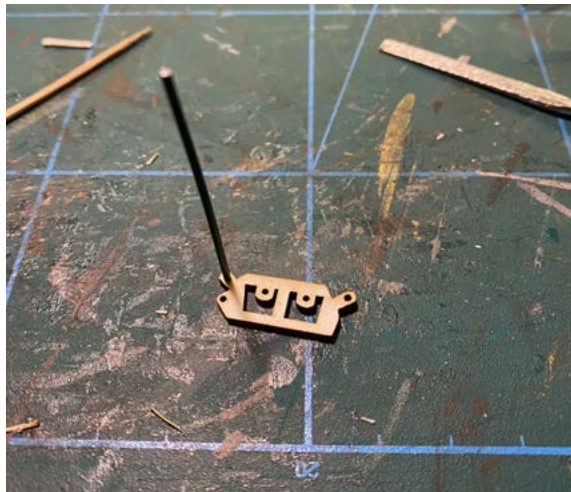

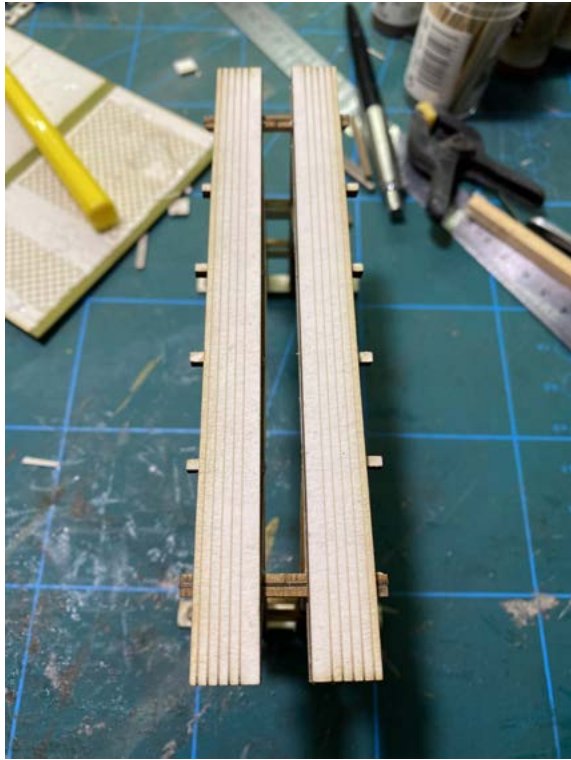

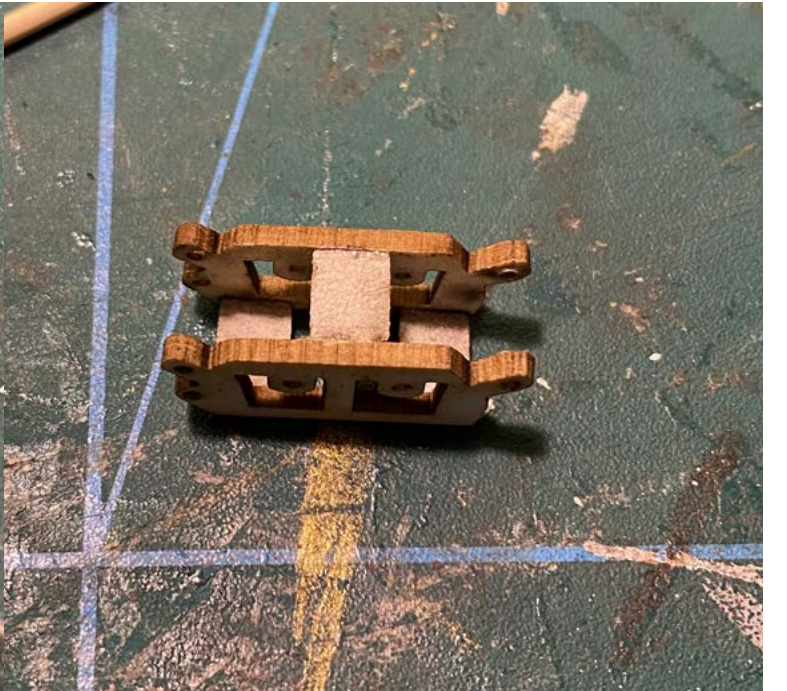

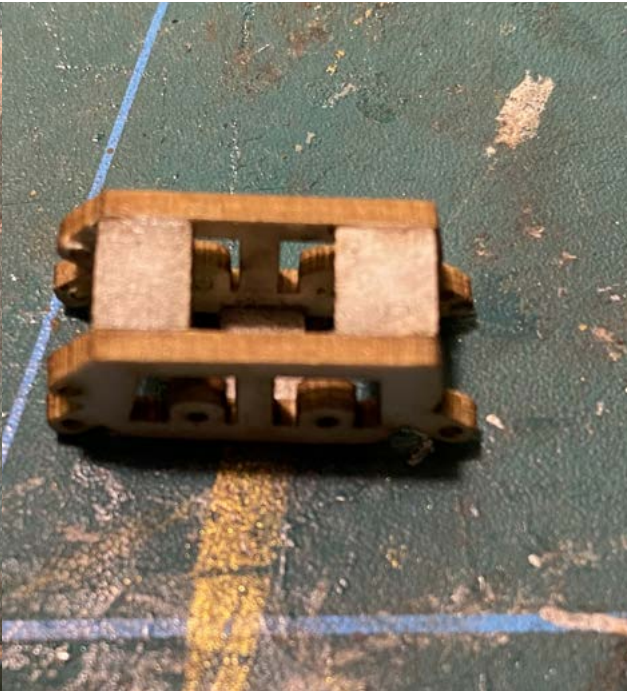

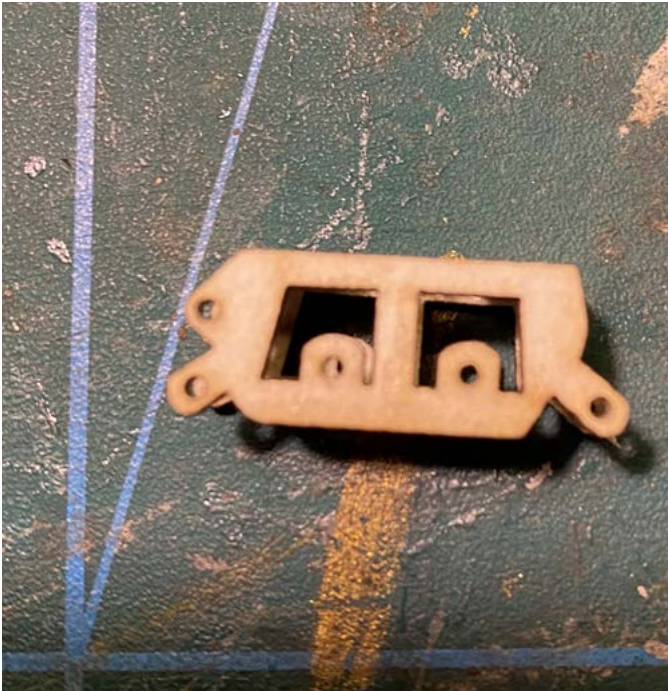

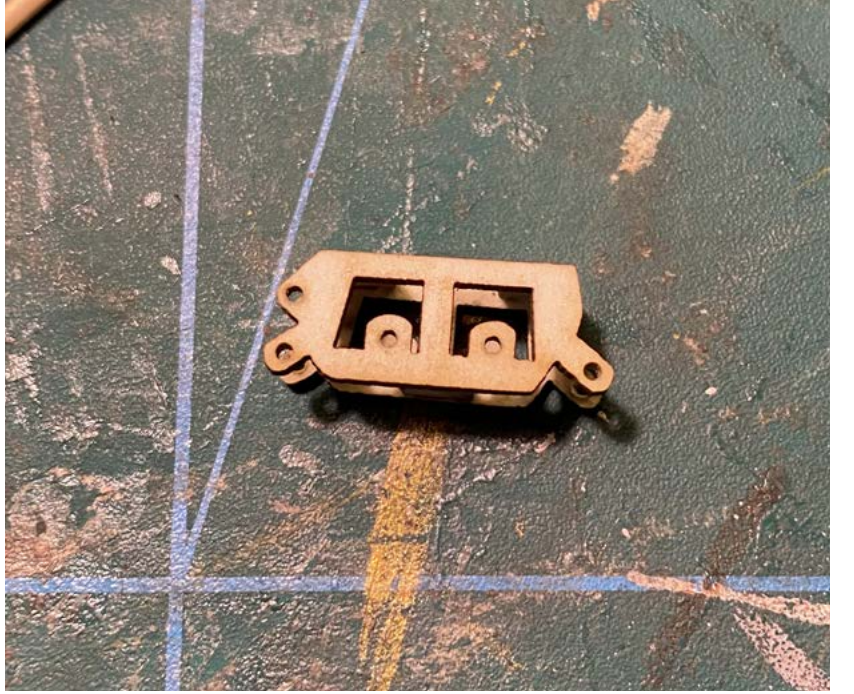

Hlavní sloupy portálu se slepí k sobě. Pro jejich fixaci a následnou lepší manipulaci se použijí pomocné podlážky.

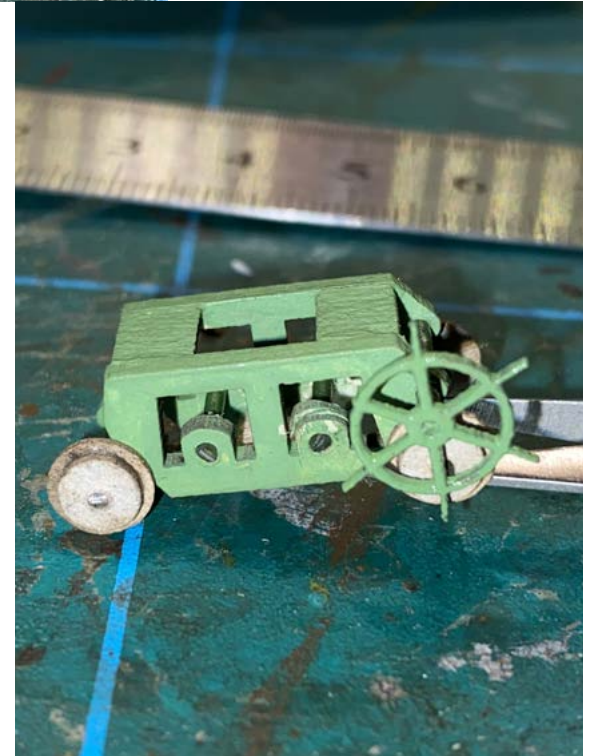

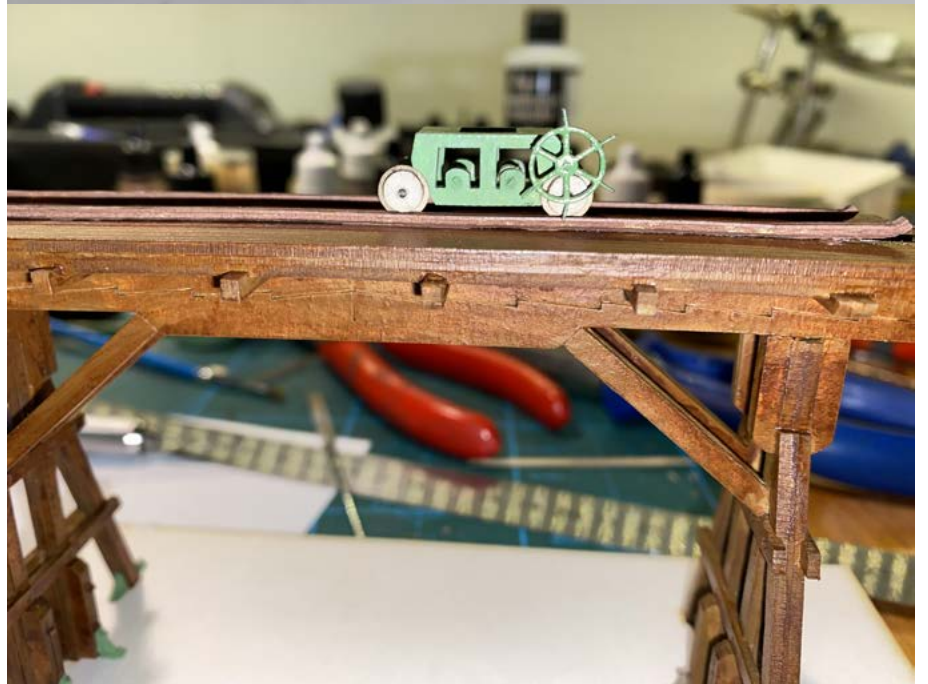

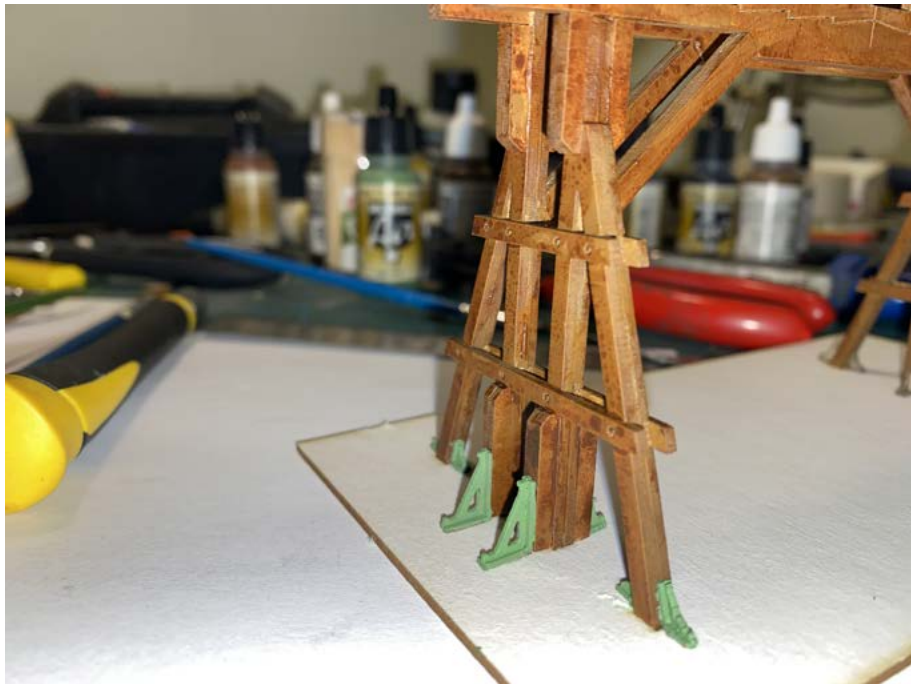

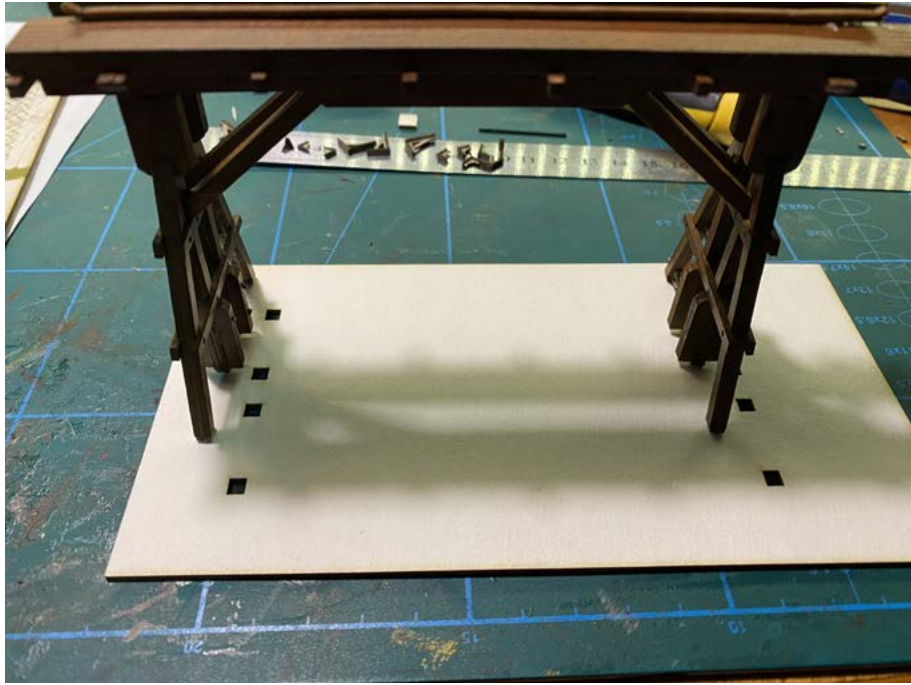

Jsou dvě cesty jak znázornit spojovací šrouby.
1) Použít vyřezané šrouby s kartonu
2) Na špičku párátko nabrat lepidlo a vytvořit kapičku jako na obrázku
